Weigh In: Report Traffic-Related Issues with Simple Online System *~~Form allows drivers, pedestrians to report infrastructure issues~~*

PASCO COUNTY, FL ---- Is there a streetlight out in your neighborhood? Have you noticed a sidewalk that needs to be fixed? Do tree branches block the stop sign at the end of your street?

Pasco County is here to help with our new [Traffic Operations Request Form](#). It’s a convenient way to report traffic and road-related issues – faster than the time it takes to wait at a red light!

You can use the simple drop-down menu in our [online form](#) to report issues and request improvements to the following:

- Street Lighting
- School Crosswalks, Signs & Flashers
- Traffic Signals
- Sidewalks
- Many More

“We work round-the-clock to make sure we have safe, reliable traffic and road infrastructure,” says Traffic Operations Manager Venkat Vattikuti. “This online system allows the community to help us identify what needs to be fixed – and where.”

[Pasco County’s Traffic Operations Division](#) is responsible for the operation and maintenance of all traffic signals, signal systems, flashing beacons and school flashers. The county has almost 2,000 miles of roads, about 1,900 streetlights and thousands of signs and signals.
